SUMMARY OF MARKET RETURNS:

March 2026

Equity markets around the world sold off sharply, as the Iranian war escalated. Brent crude prices skyrocketed after the Strait of Hormuz closed, threatening energy accessibility around the world and reviving inflation concerns. The dollar strengthened, defending its title as the go-to safe-haven asset in a high-geopolitical risk environment. Gold retreated as a result. Emerging markets, especially commodity-based economies saw significant outflows, as investors mercilessly retreated.

South African equities underperformed their emerging market peers, as March's turmoil was particularly severe locally. Resources dragged the bourse down, the withdraw from gold and platinum left SA's main equity driver for the past year very exposed. SA bonds came under pressure as yields rose, but even ILBs sold off in the volatile and uncertain environment.

- The JSE All Share ended its winning streak, losing **10.5%** over the month.
- Resources (down **15.2%**) plummeted, and Financials (down **9.6%**) tumbled, as Industrials (down **5.2%**) managed to outperform the other sectors in the drawdown.
- Small-caps (down **8.2%**) dropped, Mid-caps (up **11.7%**) fell, and Large-caps (up **10.9%**) trended lower in market conditions without reprieve.
- South African property markets didn't fare any better, as the ALPI lost **11.7%**, and the S&P SA REIT Index nosedived **13.6%**.
- SA Nominal Bonds (down **6.8%**) had a shocking month, and Inflation-Linked Bonds (down **5.9%**) dipped lower.
- Developed market equities weren't safe from the global risk off sentiment, as the MSCI World Index (down **6.3%** in USD) ended far in the red. Emerging market equities, underperformed their developed peers, as the MSCI Emerging Market Index (down **13.0%** in USD) closed significantly lower.
- The Rand weakened against major currencies, ending an almost year-long rally. Relative to the US Dollar (Rand depreciated **7.5%**), the Euro (Rand depreciated **4.9%**) and the Pound Sterling (Rand depreciated **5.5%**).
- Resources were mostly correlated to the rest of the markets, as Gold (down **11.1%**), and Platinum (down **17.6%**) lost double-digit returns. Brent Crude however added **63.3%**, as the Iranian war escalated throughout March.

ASSET ALLOCATION

ASSET ALLOCATION OVER TIME

PORTFOLIO CONSTRUCTION APPROACH

The Analytics Ci Cautious Funds of Funds objective is to provide stable capital growth with an appropriate level of income, while minimising the possibility of capital loss over the short term through active management. The fund aims to preserve capital while exhibiting low levels of return volatility. The fund aims to achieve returns of CPI + 3% over 3 years and longer. This fund complies with Regulation 28 of the Pension Funds Act and resides in the SA Multi-Asset Low Equity category.

The portfolio construction of the Analytics Ci Cautious Funds of Funds follows a specialist building block approach, i.e. investing in specialist asset classes and selecting an optimal combination of underlying funds per building block. The fund is constructed using a local equity building block (consisting of passive, multi-factor, and active components), a local fixed income building block, a passive local property building block, as well as a local cash building block. The Global component of the fund is comprised of passive and active equity building blocks, a global fixed income building block, a passive global property building block, and a global cash building block.

PERFORMANCE REVIEW

The Analytics Ci Cautious FoF returned 1.02% over the last three months, outperforming the SA MA Low Equity Peergroup Average. For the last 12 months the fund has underperformed the peergroup average.

The underperformance over the last year was driven primarily by the allocation to Global Assets, through the Analytics International Flexible Fund. This was driven primarily by a bout of local rand currency strength, which eroded the returns of global markets.

No changes were made to the FoF over the last three months.

ASSET ALLOCATION

ASSET ALLOCATION OVER TIME

PORTFOLIO CONSTRUCTION APPROACH

The Analytics Ci Moderate Funds of Funds objective is to provide moderate capital growth over the medium to long term. The fund will exhibit moderate levels of return volatility. The fund aims to achieve returns of CPI + 5% over 5 years and longer. This fund complies with Regulation 28 of the Pension Funds Act and resides in the SA Multi-Asset Medium Equity category.

The portfolio construction of the Analytics Ci Moderate Funds of Funds follows a specialist building block approach, i.e. investing in specialist asset classes and selecting an optimal combination of underlying funds per building block. The fund is constructed using a local equity building block (consisting of passive, multi-factor, and active components), a local fixed income building block, a passive local property building block, as well as a local cash building block. The Global component of the fund is comprised of passive and active equity building blocks, a global fixed income building block, a passive global property building block, and a global cash building block.

PERFORMANCE REVIEW

The Analytics Ci Moderate FoF returned 0.3% over the last three months, outperforming the SA MA Medium Equity Peergroup Average. For the last 12 months the fund has underperformed the peergroup average.

The underperformance over the last year was driven primarily by the allocation to Global Assets, through the Analytics International Flexible Fund. This was driven primarily by a bout of local rand currency strength, which eroded the returns of global markets.

No changes were made to the FoF over the last three months.

ASSET ALLOCATION

ASSET ALLOCATION OVER TIME

PORTFOLIO CONSTRUCTION APPROACH

The Analytics Ci Managed Equity Fund's objective is to provide investors with long term capital growth. The fund may invest in listed and unlisted financial instruments to achieve its objective. The fund's benchmark is the FTSE/JSE All Share Index; it does not comply with Regulation 28 of the Pension Funds Act and resides in the SA General Equity category.

The portfolio construction of the Analytics Ci Managed Equity Fund follows a specialist building block approach, i.e. investing in specialist asset classes and selecting an optimal combination of underlying funds per building block. The fund is constructed using a local equity building block (consisting of passive, multi-factor, and active components) as well as a local cash building block.

PERFORMANCE REVIEW

The Analytics Ci Managed Equity FoF returned -1.61% over the last three months, underperforming the SA EQ SA General Peergroup Average. For the last 12 months the fund has underperformed the peergroup average.

The underperformance over the last three months was driven by the multi-factor and alpha components, which underperformed the peergroup average.

No changes were made to the fund in the last three months.

ASSET ALLOCATION

ASSET ALLOCATION OVER TIME

PORTFOLIO CONSTRUCTION APPROACH

The Analytics Ci Worldwide Flexible Funds of Funds objective is to provide high long term capital growth by investing in local and global portfolios utilising active asset allocation strategies across geographical markets. The fund aims to achieve returns of CPI + 5% over 5 years and longer. This fund does not comply with Regulation 28 of the Pension Funds Act, and resides in the Worldwide Multi-Asset Flexible category.

The portfolio construction of the Analytics Ci Worldwide Flexible Funds of Funds follows a specialist building block approach, i.e. investing in specialist asset classes and selecting an optimal combination of underlying funds per building block. The fund is constructed using a local equity building block (consisting of passive, multi-factor, and active components), a local fixed income building block, as well as a local cash building block. The Global component of the fund is comprised of passive and active equity building blocks, a global fixed income building block, a passive global property building block, and a global cash building block.

PERFORMANCE REVIEW

The Analytics Ci Worldwide Flexible FoF returned 1.03% over the last three months, outperforming the Wwide MA Flexible Peergroup Average. For the last 12 months the fund has underperformed the peergroup average.

The underperformance over the last year was driven primarily by the allocation to global markets, through the Analytics International Flexible Fund. This was due to a combination of local rand currency strength along with a pullback in global equity markets.

No changes were made to the FoF over the last three months.

ANALYTICS Ci FUND RANGE COMPONENTS

Local Cash Building Block

STANLIB

Stanlib Corporate Money Market Fund

The fund is managed by Ansie van Rensburg and serves the purpose of maintaining the required levels of liquidity within the Analytics Ci Fund of Funds. The primary objective of the fund is to obtain as high level of current interest as is consistent with capital preservation and liquidity. Capital gain (as opposed to capital preservation) is of secondary importance. This composite is precluded from holding foreign exposure, direct or indirectly.

The proposition solely invests in the 'Big Five' South African Banks and AA-rated foreign banking institutions authorised to conduct business in South Africa. South African registered institutions must have at least a national short-term credit rating that is defined as 'highest credit quality' (Fitch: F1). Maximum weighted average duration is 90 days.

Local Fixed Interest Building Block

Ninety One Diversified Income Fund

This fund is actively managed by Malcolm Charles and Peter Kent and aims to provide a high level of income while seeking opportunities to maximise capital growth. The fund invests in a broad range of fixed income instruments (contracts to repay borrowed money which typically pay interest at fixed times) including government and corporate bonds. Other investments may include company shares, the units of other funds (including foreign funds), cash, property related securities (financial contracts evidencing ownership or debt) and derivatives (financial contracts whose value is linked to the price of an underlying asset). Between 5% and 25% of the Fund's value will typically be invested in property.

Ci Diversified Income Fund

This active Fixed Income Fund managed by the Analytics Fixed Income Team, invests in a mix of Fixed Rate, Floating Rate, and Inflation Linked Bonds, along with selected Credit investment Notes and Money Market Instruments. The fund aims to provide investors with a high level of income and capital preservation. The fund has a low risk rating and is benchmarked against the SteFI Composite Index.

Local Equity Building Block

FAIRTREE

Ci Alpha Fund – Active

The Ci Alpha Fund utilises Fairtree Asset Management and aims to provide investors with alpha through active sector and stock selection. The portfolio has a long-term focus and invests in securities across all sectors of the JSE Securities Exchange which trade below intrinsic value or have capital appreciation potential

Ci Equity Fund – Beta

The Ci Equity Fund provides investors with low-cost exposure to South African equities through passive investment strategies referencing the S&P South Africa Domestic Shareholder Weighted 100 Index

Ci Engineered Equity Core Fund – Multi-Factor

The Ci Engineered Equity Core Fund is a multi-factor portfolio which seeks to provide investors with a premium over the market (beta) return over long periods of time. The Fund consists of Value, Momentum and Quality components, referencing the S&P QVM 40 Index.

analytics

SECURITIES CONSULTING

Analytics Bespoke Equity – Active

The Analytics Investment Committee implement a rules-based equity strategy within the Analytics Ci Managed Equity Fund. An Approved list of SA quality securities is identified through detailed quantitative analysis, high quality scores and rigorous ongoing monitoring and applied within Analytics Ci Managed Equity Fund on a buy and hold investment approach in order to reduce transaction costs, and in line with the securities being identified as quality long-term investments.

Global Building Block

portfolio
analytics
international

Portfolio Analytics International Fund

The Portfolio Analytics International Fund is managed by Ci Global Fund Managers ICC Limited and aims to provide investors with long-term capital growth by diversifying investments across various asset classes providing the opportunity for real capital growth. The fund invests in a broad range of global fixed income and equity investments, and is benchmarked against the Morningstar EAA USD Flexible Allocation peer group average.

DISCLAIMER

General

This document is not intended to address the personal circumstances of any Financial Services Provider's (FSP's) client nor is it a risk analysis or examination of any client's financial needs. The information in this document does not constitute financial advice as contemplated in terms of the South African FAIS Act and it should not be used, relied upon or treated as a substitute for specific, professional advice. It is, therefore, recommended that investors obtain the appropriate legal, tax, investment and/or other professional advice and formulate an investment strategy that would suit the investor's risk profile prior to acting on such information and to consider whether any recommendation is appropriate considering the investor's own objectives and particular needs. Collective Investment Schemes in Securities ("CIS") are generally medium to long term investments. The value of your investment may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges is available on request from Analytics, Ci or the AIFM, where applicable. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Forward pricing is used. CIS are calculated on a net asset value basis, which is the total market value of all assets in the fund including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. The performance of the fund depends on the underlying assets and variable market factors. Commission and incentives may be paid and are for the account of the manager. International investments or investments in foreign securities could be accompanied by additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Performance quoted is for lump sum investment with income distributions, prior to deduction of applicable taxes, included. NAV to NAV figures have been used. The annualised return is the return of the performance period re-scaled to a period of one year. Performance is calculated for the fund and individual investor performance may differ as a result of initial fees applicable, actual investment date, date of reinvestment of income and any dividend withholding tax, if applicable.

Analytics Ci Fund Range

Ci does not provide any guarantee either with respect to the capital or the return of the portfolio. A fund of funds is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for the fund of funds. The portfolios may be closed from time to time in order to manage them more efficiently in accordance with their mandate. The Analytics Ci portfolios are portfolios established and administered by Ci, and Analytics has been appointed to manage and market the portfolios. Analytics is an indirect shareholder of Ci. As a shareholder, Analytics may earn dividends from time to time and participation in any dividends may be linked to the revenue generated by Ci from the Analytics portfolios, and from any other Ci portfolios. Ci retains full legal responsibility for the named portfolios. Additional information on the portfolio may be obtained, free of charge, directly from Ci. Ci is a Non-Voting (Ordinary) Member of the Association for Savings & Investment SA (ASISA).
